### *Highly Effective Classroom Assessments*

With

**Dr. Ed Roeber**

Few others in our great state could present this topic from a greater understanding than Dr. Roeber. As the father of the "criterion referenced" MEAP, Ed guided our state into an era of testing, that up until a couple of years ago, attempted to give Michigan educators the necessary feedback to adjust curriculum and teaching practices for greater student success. Come and learn how Ed's techniques can help you grasp greater understanding in how to help your students.

Participants in this workshop can expect to learn:

- The components of a balanced assessment system and how they work together
- How to create classroom assessments to gauge student learning
- How to employ formative assessments to guide student learning
- The use of all of these assessments to keep student learning on track.
